

HR Attrition Analysis Dashboard – Project Report

Project Overview

This project analyzes employee attrition patterns using Power BI dashboards to identify key drivers influencing employee turnover. The dashboard helps organizations understand workforce trends and make data-driven HR decisions.

Tools & Technologies Used

- Power BI
- Power Query
- DAX
- Excel / CSV Dataset
- Data Visualization
- Business Intelligence

Business Problem

Organizations face challenges in identifying the reasons behind employee resignations. High attrition impacts hiring costs, productivity, and workforce stability. This project helps identify high-risk employee groups and supports retention planning.

Dataset Information

The dataset contains employee demographic, salary, department, overtime, tenure, and attrition-related information.

Total Employees: 1367

Inactive Employees: 218

Attrition Rate: 15.83%

Data Cleaning & Transformation

Data preparation included removing duplicates, handling missing values, standardizing formats, creating salary slabs, tenure groups, and calculating KPI metrics using DAX measures.

Dashboard 1: HR Attrition Overview Dashboard

This dashboard provides demographic and departmental attrition insights including Age Group, Gender, Marital Status, Job Role, and Department-wise attrition analysis.

Dashboard 2: Attrition Drivers & Insights Dashboard

This dashboard focuses on major attrition drivers such as Salary Slab, Overtime, Job Level, Tenure, and Promotion Gap analysis.

Key Business Insights

- Lower-paid employees show higher attrition.
- Employees working overtime are more likely to leave.
- Early-career employees have the highest attrition.
- Promotion delays increase resignation risk.
- Sales and HR departments require retention focus.

Recommendations

- Improve compensation structure.
- Reduce overtime pressure.
- Provide better career growth opportunities.
- Focus on new employee engagement.
- Create department-specific retention plans.

Project Outcome

The project successfully transformed raw HR data into interactive business dashboards that support decision-making and employee retention strategies.
